DETAILED ACTION

1. Applicant's cooperation is requested in correcting any error of which applicant may become aware in the specification.

Response to Election

2. Applicant's election of Group I, claims 1-10, 17-27, and 41-42 in the reply filed on 02/25/2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The claims 12-16 have been included in the Group I.

The claims 28-40, drawn to a method of making a probe.

The claims 43 and 44, drawn to an apparatus for analyzing microscopic quantities.

Information Disclosure Statement

3. The information disclosure statement submitted on 09/30/2003, has been considered by the examiner and made of record. See attached form PTO-1449.

Drawings

4. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because figures 1, 2a, 2b, 3, 5, 6, 7, 8a, and 8b is too dark cannot see the number or the lines, the figure..... Applicant is advised to employ

the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Claim Objections

5. Claim 17 is objected to because of the following informalities: in line 2, "an optical fiber" should be changed to --an optical fiber probe--. Appropriate correction is required.

Allowable Subject Matter

6. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses: a method of manipulating a microscopic quantity of material (as disclosed in claim 1), a probe for manipulating small quantities of material (as disclosed in claim 17), and a method of inserting a small quantity of material into a cell (as disclosed in claim 41). All claims 1, 17, and 41 disclose the limitations an optical fiber probe having a tip with a hole fabricated therein, said hole being sufficiently small and sufficiently deep that upon immersion of said tip in said material a virtual seal forms to inhibit penetration of said material into said hole; and sending laser radiation through said optical fiber probe to disrupt said virtual seal and thereby promote entry of said material into said hole.

The underline limitations is critically, since the optical fiber probe is improved: avoid the trapping and manipulation of tiny particles such as cells and their transfer to a desired location; more easily permit entry of material into the hole; and the probe tip to penetrate into a cell without damaging it.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

7. This application is in condition for allowance except for the presence of claims 11, 28-40, and 43-58 to an invention non-elected with traverse in the reply filed on 02/25/2005. Applicant is given ONE MONTH or THIRTY DAYS from the date of this letter, whichever is longer, to cancel the noted claims or take other appropriate action (37 CFR 1.144). Failure to take action during this period will be treated as authorization to cancel the noted claims by Examiner's Amendment and pass the case to issue. Extensions of time under 37 CFR 1.136(a) will not be permitted since this application will be passed to issue.

The prosecution of this case is closed except for consideration of the above matter.
